PROFESSIONAL PROFILE

I am a UX Designer with nearly five years of professional experience creating user-centered digital products that combine business objectives, usability principles, and visual excellence. Throughout my career, I have led end-to-end UX initiatives, collaborating with multidisciplinary teams to transform complex requirements into intuitive digital experiences. My expertise spans UX Design, Interaction Design, User Research, Design Systems, Branding, Motion Graphics, and Visual Communication, allowing me to contribute strategically throughout the entire product lifecycle—from discovery and research to implementation and continuous improvement. I am recognized for my analytical mindset, creativity, attention to detail, strong communication skills, and ability to collaborate effectively with designers, developers, product owners, and stakeholders while delivering high-quality digital experiences.

CORE COMPETENCIES

UX Design • Interaction Design • Product Design • User Research • Wireframing • High-Fidelity Prototyping • Design Systems • Component Libraries • UX Strategy • User Journey Mapping • Experience Mapping • Service Blueprinting • User Flows • Task Flows • Personas • Usability Testing • Heuristic Evaluation • Competitive Analysis • Responsive Design • Accessibility • Graphic Design • Branding • Agile Methodologies • Cross-functional Collaboration • Problem Solving • Stakeholder Management

PROFESSIONAL EXPERIENCE

GEXP SOFTWARE

Creative Supervisor | UX & Brand Projects

2023 – Present

I lead strategic UX initiatives focused on designing scalable digital experiences that improve usability, user satisfaction, and business outcomes.

- Lead complete UX Design projects from discovery to final delivery.
- Conduct user research using qualitative and quantitative methodologies.
- Facilitate stakeholder workshops and discovery sessions.
- Design Information Architecture for web and mobile applications.
- Develop user personas, empathy maps and customer journey maps.
- Create user flows, task flows and interaction models.
- Produce low, medium and high-fidelity wireframes.
- Design interactive prototypes using Figma.
- Build and maintain scalable Design Systems.
- Perform heuristic evaluations and usability testing.

- Conduct competitive analysis and UX audits.
- Create service blueprints and experience maps.
- Translate business requirements into intuitive user experiences.
- Prepare UI specifications for development teams.
- Collaborate with Product Managers, Developers and QA teams.
- Support front-end implementation using HTML and CSS.
- Develop interactive digital assets.
- Ensure accessibility and responsive design best practices.
- Drive continuous product improvements based on user feedback.

GEXP SOFTWARE

Social Media Designer

July 2021 – 2023

I developed digital communication strategies and visual assets that strengthened brand positioning.

- Designed graphic content for digital marketing campaigns.
- Produced visual assets for social media platforms.
- Developed promotional materials aligned with brand guidelines.
- Managed publishing schedules across multiple platforms.
- Designed creative assets for websites and digital advertising.
- Collaborated with marketing teams to improve customer engagement.
- Created branding materials for multiple communication channels.
- Supported product launches and marketing campaigns.
- Maintained visual consistency across all digital touchpoints.
- Assisted in developing creative concepts for new initiatives.
